1 PYTHON SELECTING ACTIONS ELSE STATEMENTS WORKBOOK

Have a go at the following questions to practice your new found skills.

If you have any questions, go back to the course videos and have another look. One version of the answers is available in the next download. Remember, there are different ways to write code to get the same answer, so your answer can be correct and different to the answer example!

If you feel stuck and want some in person help, then have a look at the events page to join in a workshop <https://swamphen.co.uk/events>.

In [2]: *# length of time these singles were in the charts*

```
crazy = 14
save = 6
play = 8
another = 10
flash = 13
```

In [1]: *# which single spent the longest in the charts, play the game or flash?*

In [2]: *# which single spent the least time in the charts, another one bites the dust
#or save me?*

In [3]: *# write an if else statement to work out if the time spent in the charts
#is divisible by 4*

In [4]: *# sort the singles into 2 categories
under 7, 8+ weeks*
