## 1 PYTHON TEXT SEQUENCE STRING WORKBOOK

Have a go at the following questions to practice your new found skills.

If you have any questions go back the the course videos and have another look. If this doesn't help then the answer may be in one of the recorded Q&A or critique sesions. If not, please submit your question via email (courses@swamphen.co.uk) and we can put it on the list to be answered in one of the Q&A sessions.

If you feel stuck and want some individual help, then you can have a look at the events page to see if one of those sessions will help. If not, remmber I run 1-1 and small group tutorials.

In [17]: *# set up a string for each of your given names*

In [18]: *# set up a string that says your pet's name is X  
# e.g. tamara's hamster is called emcee*

In [19]: *# if you wanted to put each of your names on a new line  
# how would you do this in one string?*

In [20]: *# use the strings created in the first question to print  
# your name on one line*

In [21]: *# add gaps between the individual names so it reads more clearly*

In [22]: *# make a string of your favourite song lyric*

In [23]: *# select just the second word*

In [24]: *# select everything after the third word*

In [25]: *# select the first bit of punctuation*

In [26]: *# select the first instance of the letter a*

In [27]: *# select the letter that is latest in the alphabet*
